EXHAUSTING AIR PROMOTES DECOMPOSITION.—Any at-

tempt to exhaust the air from a receiver of the body of a deceased person, would promote rather than retard decomposition.

1. Under such an experiment, the expansion of the air within the tissues, would cause more or less fracture, and produce an effect similar to a bruise.

2. The temperature of the atmosphere would have a greater influence in proportion to the removal of atmospheric pressure.

pressure.

The presence of atmosphericair is not essential to decomposition, whereany degree of putrefaction already exists, as the last change will communicate to other parts, causing their elementary constituents (oxygen, hydrogen, ittrogen, and carbou) to separate, and reunite with a sit lar effect to that produced by the presence of atmospheric air. Thus, under a constant exhaustation, the effect of an elevated temperature upon the moisture of the body would be more powerful, and, consequently, decomposition more

TESTIMONY OF THE PROF. OF OBSTRUCES IN PENN. Co TASTIMONY OF THE PROF. OF CHARTERIS IN PRINK COLLEGE, PHILADELPHIA.—DR. HUNTER'S MEDICAL MANUAL.—The author of this work unlike the majority of those
works who advertise to cure the diseases of which it treats,
is a graduate of one of the best Colleges in the United
States. It affords me pleasure to recommend him to the
unfortunate, or to the victim of malpractice, as a successful
and experienced practitioner, in whose honor and integrity
they may place the greatest confidence.

JOSEPH LONGSHORE M. To JOSEPH LONGSHORE, M. D. FROM A. WOODWARD, M. D., OF PROS. UNIVERSITY, PHIL

ANLIPRIA.—It gives me pleasure to add my testimony to the professional ability of the Anthor of the "Medical Manual." Numerous cases of Diseases of the Genital Organs, some of them of long standing, have come under my nonce, in which his skill has been manifest in restoring to perfect health, in some instances where the patient has been considered beyond medical aid. In the treatment of Seminal Weakness, or disarrangement of the functions, produced by self abuse or excess of venery, I do not know his superior in the profession. I have been accurated with the rior in the profession. I have been acquainted with the Author some thirty years, and deem it no more than justice to him, as well as a kindness to the unfortunate victim of early indiscretion, to recommend him as one, in whose professional skill and integrity, they may safely confide them.

tesisonal skill and integrity, they may safely confide them, selves.

"This is, without exception, the most comprehensive and intelligible work published on the class of diseases which it treats. Avoiding all technical terms, it addresses their to the reason of its readers. It is free from all objectionable matter, and no purent, however fastidious, e to placing it in the hands of his sons. The author has disroted many years to the treatment of the various complaints treated of, and 'with too little breath to puff,' and 'too little presumption to impose,' he has offered to the world at the merely nominal price of 25 cents, the fruits of some twenty years most successful practices"—Heruid.

"No teacher or parent should be without the knowledge imparted in this invaluable work. It would save years of pain, mortification and sorrow to the youth surfer their pain, mortification and sorrow to the youth un charge."—People's Advector.

A Presbyterian elergyman in Ohio, in writing of "Hun-er's Medical Manual," says:—"Thousands upon thousands of our youth, by evil example and influence of the passions, have been led into the liabit of self-pollution without realizing the sin and fearful consequences upon themselves and posterity. The constitutions of thousands who are raising families have been enfeshled, if not broken down, and thes families have been enfeebled, if not broken down, and they do not know the cause or the cure. Anything that can be done so to enlighten and influence the public mind as to check, and ultimately to remove this wide apread source of human wretshedness, would confer the greatest blassing next to the religion of Jesus Christ, on the present and coming generations. Intemperators (or the use of intoxicating drinks,) though it has slain thousands upon thousands, is not a greater scourge to the human race. Accept my thanks on behalf of the afficied, and, your co-worker in the good work you are so actively engaged in."
